What is CMT?

Campus management Tool is specifically designed to streamline the paperless administration of schools and educational institutions. It consists of various modules that greatly help the teachers and staff in maintaining student records, academic history, and other essential student information. An efficient school management system acts as a unifier for the different departments/functions and can be accessed from any location. Web-based school management software is the best way to manage a school in a productive, systematic and organized manner.

About Us

Geniecampus is a wholly owned subsidiary of Adiguru Services LLP. At geniecampus we believe every educational institute, Hospital deserves to have a web application to streamline their activities and to protect their data. Innovation and simplicity makes us happy. Our goal is to remove any technical barriers that can prevent stakeholders from using their own dashboard and modules. We're excited to help you on your journey
